

Statement of Achievement

Arjae Borja Cabahug

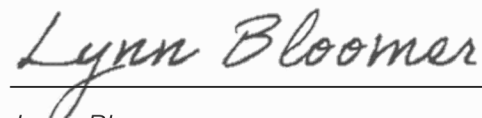

has successfully achieved student level credential for completing the Introduction to Greenhouse Gas Accounting for IT course, provided by Cisco Networking Academy in collaboration with OnePointFive.

The graduate is able to proficiently:

- *Explain the importance, limitations, and structure of GHG accounting, including Scope 1, 2, and 3.*
- *Apply key GHG accounting principles to set boundaries and avoid double counting.*
- *Identify emissions sources across a company's value chain and categorize them into scopes.*
- *Evaluate data collection methods and emission reduction strategies for each scope.*
- *Conduct a basic Scope 1 and 2 GHG emissions model calculation.*
- *Recall interventions that can reduce Scope 3 emissions within the IT Sector.*
